

RealVision Manufacturing Solutions, Inc.

DocManager — Document Management for Manufacturing and Technical Document Management

DocManager is a comprehensive manufacturing/technical document management and distribution system. DocManager was specifically designed to be a network application, creating one central source for all document activity. It manages a full complement of document files, including CAD, sketches, scanned images, PDF files, etc. Additionally, DocManager organizes, tracks revisions, allows viewing of the document, builds associations with part numbers, allows parts to have multiple documents and allows multiple documents for single parts.

Features Include:

- Document number builder
- Document to part number link BOM creator
- Engineering change manager
- Revision control and archive manager
- Printed document control and tracking
- Work flow manager
- Powerful red-lining and request for engineering change system
- Automatic document archiving and retrieval as well as document vaulting
- Allows true concurrent engineering
- Automatically passes documents, revision control, ECN's engineering holds and alerts to the ProDocTivity system for total control of the manufacturing environment
- Meets ISO9000 and stringent revision control requirements
- Multi-user network independent system

"We chose RealVision DOCManager for its built-in flexibility that allows us to distribute critical information for our shop floor and maintain control"

D. Winters Johnson Inc.

DOCManager gives you:

- Complete and accurate document & Revision management
- Scalability to grow
- Increased productivity and control
